-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Abstract Objections

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -
(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by La Porta et al. (US 6763007, "La Porta").

Regarding claim 1, La Porta discloses a path control device, comprising:

- a path control information storage means (a routing table, see col.21, ln.24-26) for holding a plurality of pieces of path control information kept in a stored state (handoff path, see col.21, ln.17-26), the plurality of pieces of path control information being

transferred from the plurality of transfer devices (path setup message, see col.21, ln.24-42), and

- a path control means (means, not shown in fig 14, for processing handoff path setup message, see col.22, ln.29-35) for recognizing a path between a mobile terminal (MD, see 114 fig.14) and the correspondent terminal (a user's terminal connected to 362 for communicating with MD, see 362 fig.14), based on a location information of each of the mobile terminal (new-to-old path setup for handoff of MD, see col.21, ln.5-16; 114 fig.14 and col.21, ln.17-23) and the correspondent terminal as a correspondent node (CN side, see fig.2; a user's terminal connected to 362 for communicating with MD, see 362 fig.14) and as well as the plurality of pieces of path control information (all of the control information for processing handoff path setup message, see col.22, ln.19-50), so as to be able to determine a transfer device that serves as a switchover point of the path (cross-over router, see R7 fig.14 and col.21, ln.39-42), on the occasion of a change of the path accompanied by an occasional migration of the mobile terminal (handoff of MD, see fig.14 and col.21, ln.39-42).

Allowable Subject Matter

4. Claims 4-6 are allowed.
5. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jung Park whose telephone number is 571-272-8565. The examiner can normally be reached on Mon-Fri during 6:15-3:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau Nguyen can be reached on 571-272-3126. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
